Subject: Now this the America I want! Thanks for standing up for Dimock!

Dear Lisa Jackson,

We have to stop destroying our life support system. I can't thank you enough for starting the process.

Even the creator of the Fracking Process is campaigning on its disastrous effects on people and the planet.

Thank you for your agency's efforts to help families in Dimock, PA who have been victims of contaminated water from fracking. It is critical that the federal government continue to step up when states do not put their citizens first.

I also encourage you and your agency to do a thorough investigation of this water contamination and the threats to safe drinking water from hydraulic fracturing.

Sincerely,
